

Opportunities in Cancer Prevention and Control

Postdoctoral Fellow (Multiple Positions)

Request for Applications

Washington University School of Medicine and Siteman Cancer Center, a National Cancer Institute-designated Comprehensive Cancer Center, are seeking applications for **Postdoctoral Fellowships in Cancer Prevention and Control**.

We are particularly looking for candidates with an interest in cancer disparities, implantation and dissemination sciences, health behavior, cancer communication, community-engagement research, and/or cancer epidemiology. However, all applications will be considered. **Applications are considered on a rolling basis.**

Eligibility: PhD, DrPH, MD, or other doctoral degree in a public health related discipline, or a doctoral degree in another discipline with an interest in transitioning to public health research. Applicants are limited to United States citizens, non-citizen nationals, or must be lawfully admitted for permanent residence and possess an Alien Registration Receipt Card.

A strong mentoring and career development program is in place in the Division of Public Health Sciences with a track record of successfully placing trainees. The Division of Public Health Sciences conducts world-leading research, education and outreach to prevent cancer and other diseases, promote population health, and improve quality and access to health care in Missouri and beyond.

Washington University offers excellent benefits and competitive salaries. Support for tuition, books, software and conference travel is available.

Benefits

- Diverse faculty and transdisciplinary environment
- Trainees linked with a mentoring team
- Support for further training and professional development
- Competitive salary and benefits
- Two years of support, possible third year
- Funding is possible through a T32 grant from the NCI

The division is led by Graham Colditz, MD, DrPH, An internationally recognized leader in cancer prevention. Our vibrant group of multidisciplinary faculty conducts research on a wide range of health issues, and there are opportunities to collaborate with clinical, basic science, statistical, and other faculty across the academic campuses of Washington University. Siteman Cancer Center is a NCI-designated comprehensive cancer center with a strong Prevention and Control program.
